Dividend Payout Report 股息分派報告

Important Information

- The Fund invests in debt and debt-related securities issued by corporations (including government-owned corporations) in a CEMBI Emerging Market as at the date of investment.
- The Fund is exposed to risks related to investing in debt and debt-related securities, emerging markets, investing in sub-investment grade and/or unrated debt securities, securities lending agreements, currency and exchange rates.
- The Fund follows the abrdn "Emerging Markets Corporate Bond Promoting ESG Investment Approach" and is therefore subject to ESG investment policy risks.
- The Fund's net derivative exposure may be up to 50% of the Fund's net asset value and subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- The Fund may at its discretion pay dividends out of the capital of the Fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Fixed distribution shares will declare and distribute a fixed rate per annum (which will be pro-rated accordingly depending on the relevant distribution frequency), regardless of the performance of the Fund. Investments in fixed distribution shares are not an alternative to a savings account or fixed-interest paying investment. A positive distribution yield does not imply a positive return.
- Investment in this Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the Investment could be lost.
- Investors should not solely rely on this document to make any investment decision and should read the relevant offering documents for further details including risk factors before investing.
